Yonderland ROCK

A SPORT CLIMBING TOPO

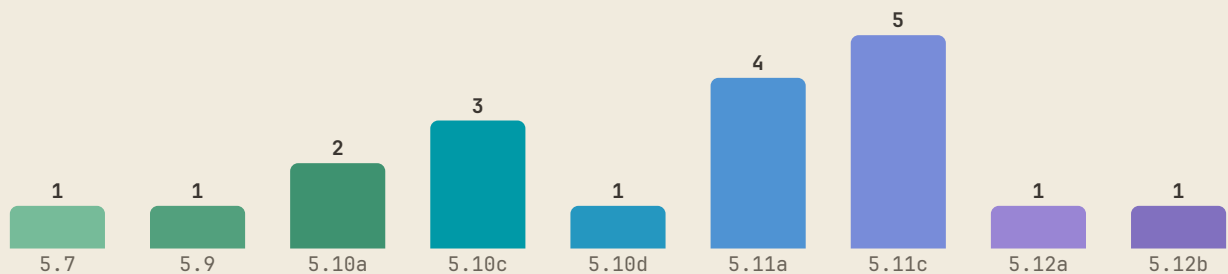

19 routes • up to 20 m • West-facing sport climbing

TOTAL ROUTES
19 sport + 1 project

ROUTE LENGTH
up to 20 m

APPROACH
1.4 km • 20–25 min

GRADE DISTRIBUTION

DEVELOPED BY NIGEL SLATER & ROBIN BARLEY

Approach & Overview

Getting there, what to expect, and other-user etiquette.

Developed in 2024/25 by Nigel Slater and Robin Barley, this west-facing sport crag features 19 well-bolted routes reaching up to 20 m high. Characterised by bulges, overhangs, and technical crimping, it offers a solid selection of climbs in the 5.10 to 5.11 range, with a couple of 12s. Huge thanks to David C., Leon R., and Christopher C. for generously donating ropes toward the development of this crag.

PARKING

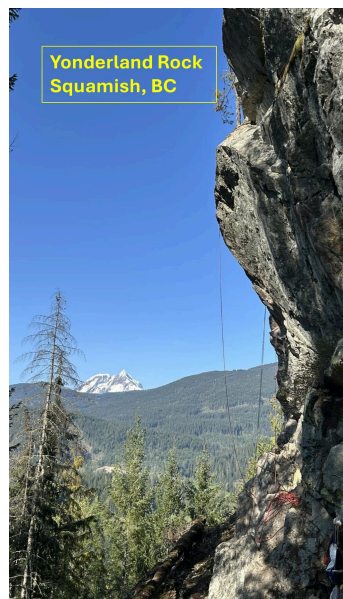

Approach as for Fern Hill — from the large parking lot at the end of the Powerhouse Springs forest service road. There are ongoing construction activities with the Pipeline and Squamish Canyon project, so follow the “**Visitor Parking**” signs.

NOTE

Not a brilliant place for small children — knotted ropes are needed to access the ledge below the climbs, and some friable rock remains. **Helmets strongly recommended.**

Located roughly 10 minutes “around the corner” from Fern Hill. About 10 minutes by bike from the lot.

GPS · 49°43'24"N 123°06'19"W

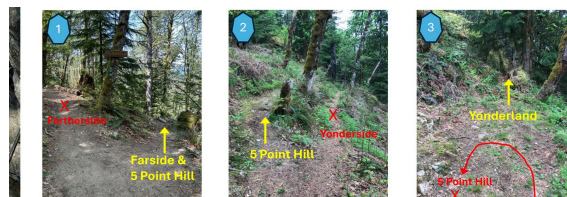

Looking out from the crag toward the Tantalus range.

APPROACH (1.4 KM · 20-25 MIN)

From the north end of the lot (toilet block) walk through the concrete blocks and along the trail for 200 m, then take the “**Far side**” trail left into the forest. After 900 m and ten switchbacks, keep right on Far side trail at the wooden signpost for **5 Point Hill** (photo 1).

Far side trail contours west around the hillside. Keep left at the fork to 5 Point Hill (photo 2), then 20 m past the sign go straight into the forest (photo 3), up the slope (fixed rope), and the crag appears on the left.

Approach waypoints 1 → 3.

CRAG NOTES

West-facing. Morning shade until 2 pm, then full sun. A steady afternoon breeze keeps it pleasant.

Mosquitoes. Noticeably fewer than nearby crags — one of the more livable Squamish summer venues.

Gear. 10–14 quickdraws suffices for most routes. All routes equipped with lower-offs.

Top-rope etiquette. Use your own quickdraws on the anchors to reduce wear on the fixed gear.

Far Left

Three routes on the leftmost bulge — a short warm-up and two cruxy lines.

1 A sigh of resentment 5.9

Climb through the bulge at the left edge of the crag. A short warm-up.

4 bolts • Nigel Slater & Robin Barley, 5 April 2025

2 Half a Dream 5.12b

Direct through the bulge on crimps. A 7-move wonder. Dream or nightmare? Fixed gear but bring a quickdraw for the top.

Nigel Slater & Robin Barley, 14 June 2025

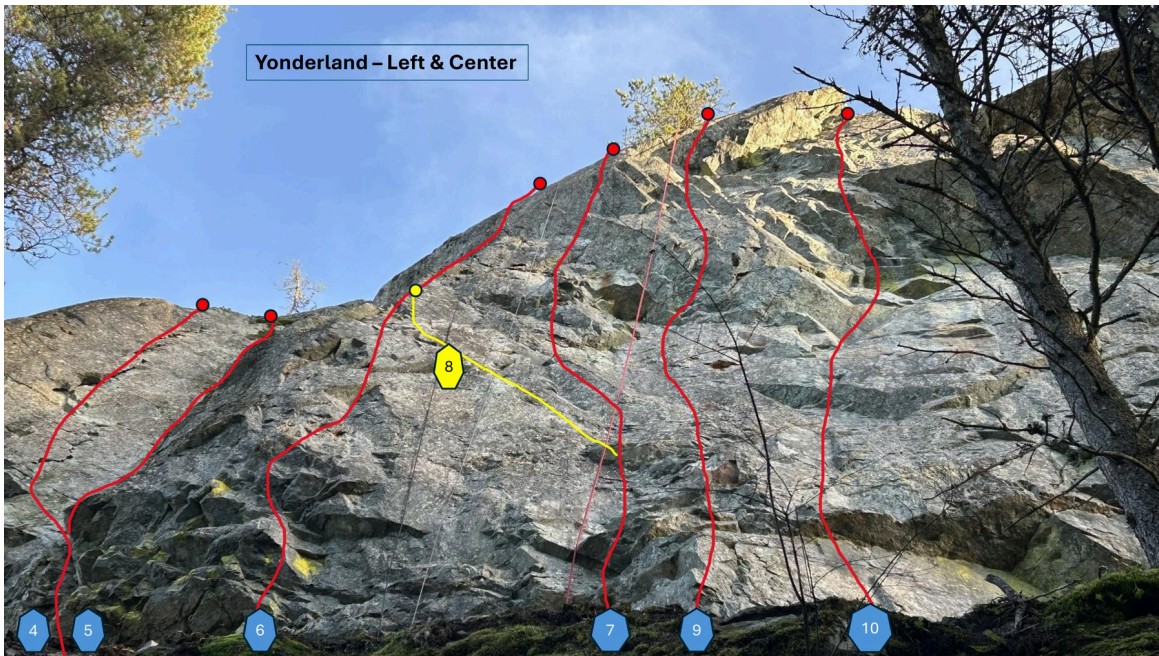

3 Ok Deary 5.11c

Above the fire, roof, shallow corner, then left up the ramp. Fixed gear in the lower section — bring two quickdraws for the upper wall. Fun climbing and heel hooking.

Nigel Slater & Robin Barley, 5 April 2025

Left & Center

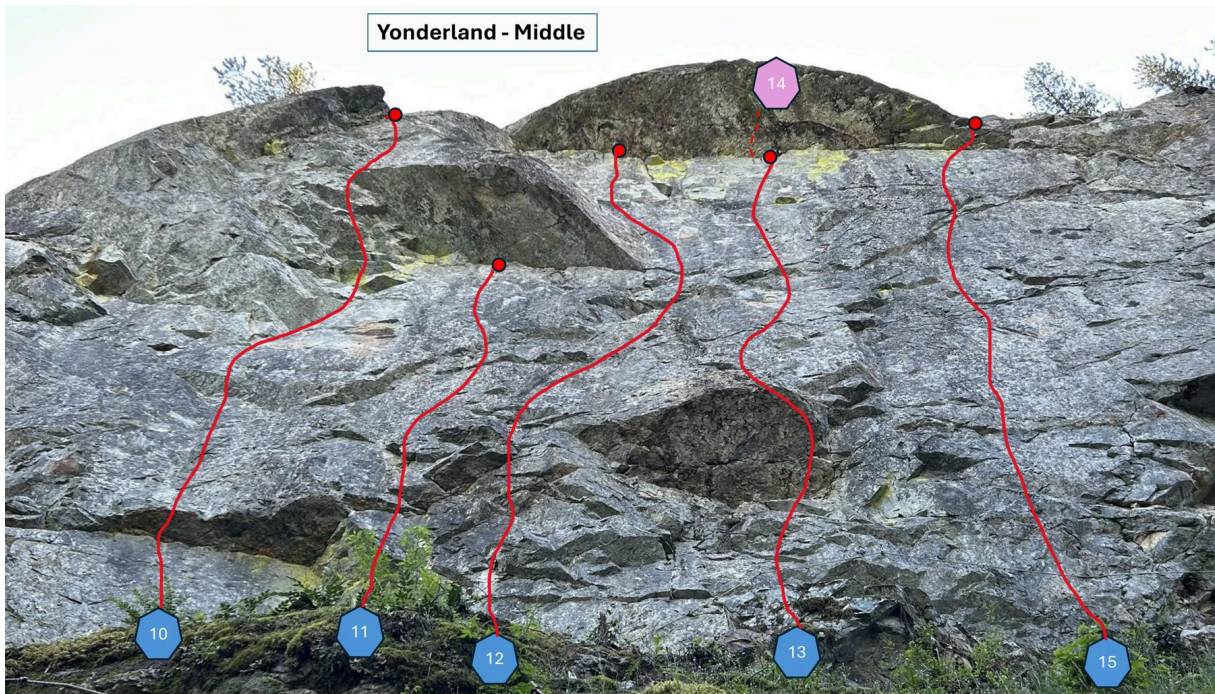

The main spread — seven routes from the open groove across the central face.

- 4 Grizelda's Flake** 5.10a
Start below the big open groove. Boulder through the bulge, then climb the flake in the left wall.
Hugh Dickens, 11 August 2024
- 5 Robby's Runnel** 5.10a
Same start as #4, but continue up the open groove with interest.
Nigel Slater & Robin Barley, 13 July 2024
- 6 Old Cronies** 5.11a
Tricky start through the bulge, then ascend the wall, arete, and airy headwall and final slab. Go past the white anchor rings on route #8.
11 bolts • Nigel Slater & Robin Barley, 20 July 2024
- 7 Fudge Finder** 5.11a
Direct to the bulge, then move right up steep ground to finish over the lip.
9 bolts • Nigel Slater & Robin Barley, 27 July 2024
- 8 For Octogenarians** 5.7
Connector from route #7 to rappel rings on #6 (white bolt and anchor rings).
Robin Barley, 5 May 2025
- 9 Brassed Off** 5.11c
Yellow/green bolts. Start off the block, then direct with hard moves through the bulge.
10 bolts • Nigel Slater & Robin Barley, 26 November 2024
- 10 The Good, the Bad and the Sloper** 5.11c
Tricky start, then direct up the wall to tough moves through the left side of the diamond-shaped roof.
11 bolts • Nigel Slater & Robin Barley, 4 August 2024

Middle

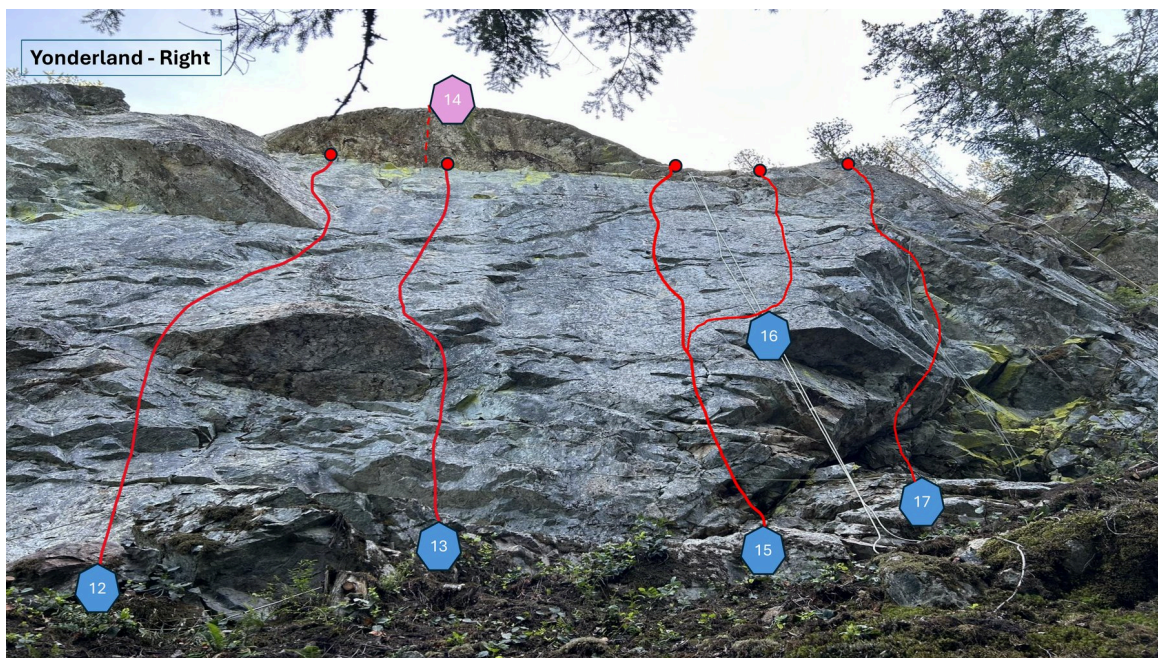

Crimpy walls into the big semi-circular roof — pick your line under the lip.

- 11 Shaddoodled** 5.10c
Short crimpy climb to finish under the diamond-shaped roof. Starts in the shallow corner.
5 bolts • Nigel Slater & Robin Barley, 27 July 2024
- 12 Queen of the sofa** 5.10c
Starts at the left end of the rope traverse. Wall to hanging groove, then step right and finish up the crack under the left end of the big semi-circular roof.
Nigel Slater & Robin Barley, 13 July 2024
- 13 The Floater** 5.11c
Start on the block midway along the rope traverse. Anchor your belayer. Perplexing moves over the lower bulge ("beached-whale style"), then direct up the wall to the sapling under the big roof.
Nigel Slater & Robin Barley, 13 July 2024
- 14 Big Roof project** **CLOSED PROJECT**
In progress — closed.
- 15 Bloatamax 3000+ pro** 5.11a
Start at the right end of the rope traverse. Anchor your belayer. Directly up the wall, then over the right end of the big semi-circular roof, and up the slab to finish.
13 bolts • Nigel Slater & Robin Barley, 1 September 2024

Right

Two routes squeezed under the big roof's right side.

16 Hog Patrol 5.11a

Move right from the second bolt on route #15, then directly up the wall to a separate lower-off.

Nigel Slater & Robin Barley, 15 September 2024

17 The Honey-do List 5.12a

Bouldery cave roof, then right into the corner, back left over the second roof, to an easier finish. Start off the sloping shelf at the left side of the yellow alcove.

Something to tick from the list...

Nigel Slater & Robin Barley, 13 July 2024

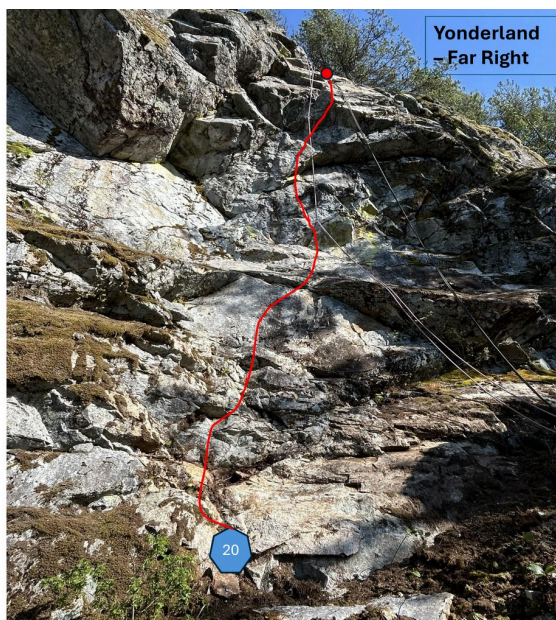

Far Right

The crag's right-hand end — slabby starts into steep boulder problems.

- 18 Off the clock** 5.10d
Roof and wall right of the yellow alcove, starting off the large boulder. A little ledgy, but has some fun moves.
Nigel Slater & Robin Barley, 26 April 2025

- 19 Fatberg** 5.10c
Start 2 m right. A steep start, then exit through the left side of the diagonal roof. Named for the 130-tonne, 250-metre London fatberg that blocked a section of Victorian-era sewers for over two months.
Nigel Slater & Robin Barley, 26 April 2025

- 20 Water Story** 5.11c
Last route at the far-right end. Slabby start followed by a steep boulder problem to the black headwall.
6 bolts • *Nigel Slater & Robin Barley, 10 May 2025*
